I learned a bit more about the August 24th meeting with Region 3 and their states today. The states have submitted 16 topics to discuss which may be tough to pack into a 5 hour agenda. Topics include PFAS, lead in soil and drinking water, cooperative federalism, and WVa will likely raise conductivity/mountain top mining issues (though these issues are currently not included in the 16 that have been submitted).

ORD is scheduled to present between 12:15 – 1:00. As you know, Lisa has prepared the attached slides for your consideration. It would be good to grab 30 minutes on Thursday the 17th to figure out how you want to proceed with the presentation. Nathan, can you please set something up.

I was told that you're welcome to stay for the entire meeting. Apparently the Regional Science Liaison and a few others would like to meet with you before you head back to DC. Let's talk about that on the 17th as well.

Thank you!

Liz
